Personal Projects

Portfolio Website | ramasentani.github.io

Personal portfolio site to showcase all of my projects. Built from scratch using HTML, CSS, and JavaScript.

Employee Directory

A prototype for an employee directory. Request a JSON object from Random User Generator API using fetch and parse the data so that 12 employees are listed in a grid with their information.

Interactive Photo Gallery

An interactive and searchable photo gallery built using JavaScript and CSS Grid Layout. Using baguetteBox.js as a lightbox function.

Wheel of Success

A word guessing game where players will click letters from an onscreen keyboard to try to guess a random phrase.

Web Style Guide

A useful Sass micro-framework to quickly prototype other websites.
